

**To whom it may concern**

We are a BOI company engaged in the manufacture of rubberized gaskets for plate heat exchangers. We are an 100% export venture.

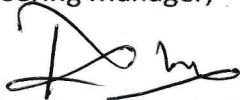

We engaged the services of Sirocco Air Technologies Ltd to design and install fresh air inflow systems for our work stations. This entailed importation of specialized ventilation equipment from sources in the European continent, for which Sirocco held exclusive franchises.

Throughout our association with them, now spanning several years, they have maintained consistent standards of execution with rigid adherence to our specifications and within stipulated timeframes.

We have not had any issues as to the performance of the equipment under production conditions and their after sales service has been well up to our expectations.

We take pleasure in recommending their expertise and services.
