To Whom It May Concern

Sirocco Air Technologies was awarded a valuable contract for the installation of a ventilation system and a general factory upgrade. They secured the contract in the teeth of fierce competition, though they did have an edge as they had undertaken as installation at our sister company A& E Sri Lanka to their complete satisfaction.

The project entailed of designing a suitable cooling system for the dye house and suitable racking system for storage of finished goods. Their proposal was to use evaporative cooling as spot cooling for the workers and lower energy consuming, roof fans for hot air extraction.

Sirocco arranged simultaneous shipments from Malaysia, Italy and Sri Lanka and their coordination was such that all the equipment arrived in Chittagong port at much the same time.

The project has been complete success with a significant drop in the temperature and significant increase in worker comfort. Sirocco flew over a competent installation crew who carried out the work well within the stipulated time frame and well up to our highest expectations.

We are aware that their professionalism is a by word in their home country and it is our understanding that they have just been awarded a lucrative contract by MAS Intimates, Bangladesh.

We have just obtained quotations for ventilating the other part of the factory upgrading storage racking system and steel structural mezzanine floors.

We have no hesitation in recommending them any other line business that they are engaged.

Thank you

Angelo Leamage
Managing Director
