To whom it may concern:

Lanka Princess Hotel is a high end beach hotel situated at picturesque Moragalla, on the southern coastal belt. We cater to an exclusive German clientele that journey here to avail themselves of the amenities at our Ayurvedic Centre and Spa.

For quite some time our operation was plagued with the odors from the hotel kitchen located in the ground floor, pervading the treatment center, which was anathema to our guests.

We took our problem to Sirocco Air Technologies, which had an enviable reputation for providing practical ventilation solutions.

They sent an investigative team followed by a visits by their design engineers and, within a few working days, put up a convincing proposal to us, which met our approval.

Sirocco imported out a custom built Sound Proof inline cabinet fan of German origin & Electrostatic Precipitators of Singapore origin. (Sound is a critical factor as Ayurvedic treatment is administered to clients in a meditative posture and, disturbance is taboo.) During the down time for fan arrival, Sirocco fabricated in their own work shop, the necessary ducting and mounting accessories which they coupled to two Electrostatic Precipitators for filtration of the exhaust air. The Electrostatic Precipitators works flawlessly and it eliminates the oil, the kitchen odor & smoke. The fan was duly installed and the whole operation was concluded well within the quoted delivery time.

We now have a kitchen with an extremely pleasant ambient with the offensive air exhausted, filtered and ducted well away from the treatment center and the living quarters.

Suffice it to say that we will partner with Sirocco Air Technologies in any future projects and, we have no hesitation in recommending them to any entity requiring their services.

S. K. Pradeep Prabosanna,  
Chief Engineer
