TO WHOM IT MAY CONCERN

As a result of MAS Intimates Bangladesh strategic plan to enhance production capacity in Bangladesh; it was imperative that related storage capability supporting the systemized movement of material was developed accordingly.

The tender floated for the design, fabrication & installation of a storage solution was awarded to Sirocco/OkMart Group from Sri Lanka. They were selected on the basis of their design, competitive pricing and prior exposure to projects in Bangladesh, having most recently completed an extensive contract for American & Efird-Bangladesh. In addition, they have an impressive track record in racking and ventilations solutions in Sri Lanka across corporates in a multitude of industries.

While the bulk of the new racking system was sourced from Malaysia, Sirocco proposed numerous value additions by integrating much of the existing racking into ingeniously designed rack supported mezzanines; which added enormously to our operating floor space. This while providing considerable overall cost saving on the entire project.

The final product was not only an optimum racking solution but also had finishes and optics that have been since been commended by our strategic partners / clients and group management. Key features introduced:

- Two electrically operated goods hoists for transporting material within floors.
- Self-designed goods chute coupled with gravity flow for movement of finished goods from storage floors to the loading bay.
- Portable electrical roller conveyor
- Dock ramp leveler which equalizes the heights of load beds of lorries at the loading bay.

Sirocco executed their contract sans undue disturbance to our ongoing operations, well within the agreed time frames to our entire satisfaction. Their work ethic is beyond reproach and they are one of the most professional and competent outfits we have had the experience in dealing with.

We are happy to provide a reference for any future projects where their services are sought.

Yours Sincerely

Eraj Wimalasuriya
Chief Executive Officer
